RE: Full Stack Developer

Dear Sir/Madam

I was motivated to contact you upon learning that RBC has an opening for a Full stack Developer. I have an Advanced Diploma in Computer Programming and Analysis with more than five years of experience which will allow me to significantly contribute to the productivity and quality of your company's IT division.

As a student at George Brown College, I have gained excellent hands-on experience with Software Development and Web Programming and a vast knowledge with languages like, Java, Python, C#, JavaScript, and PHP. This college experience has provided me with important skills and confidence required to succeed in a competitive environment. I spent most of the time developing applications like a Flight Reservation System, an Examination Website, and an auction site. In addition, I have taken several advance courses in programming, to stay updated with current trends and frameworks like Bootstrap and React.

Thank you for your time and consideration, I look forward to hearing from you to set up a time for an interview. It would be mutually beneficial for us to meet and discuss the goals of your company and how my technical abilities can help you achieve those goals. Please feel free to contact me at (647) 333-4444 or at divineiyalla.falola@gmail.com

Sincerely

Divine Falola
